Hours are based on normal operator manning, normal spillage of product, weather condition, and the like.

All information regarding the requirements of washdowns can be checked with the MWPA Operations Supervisor.

All Hours are calculated based on time to washdown and conduct necessary chute changes.

All plant inspections are generally completed in daylight hours as per shipper's requirements.

	Product loaded from CV401 circuit
	Product loaded from CV03 circuit

SHIPLOADER 4 CHUTE:

CAS White/Black - Products requiring the Cascade Chute with white or black buckets for loading.
All other products use the Telescopic/Artic Chute.
