CBH Harvest Trucking Operations Caution – Additional Traffic

2016 harvest operations are now underway in the Mid West district and CBH grain receivals have already commenced.

CBH are again utilising the south side of the open bulk handling (OBH) area as a location for truck assembly prior to entering the sampling and weighbridge areas located on the site. The attached map shows the planned traffic flows for the area around Port Way, Marine Terrace, Point Street, Ocean Street and John Willcock Link.

The intersection of Ocean Street and Haigh Street, being the exit and entry point for CBH trucks as well as the exit point for Qube trucks is best avoided if at all possible.

Please exercise caution and be aware of additional heavy vehicle truck movements around the Port precinct during the next three months.

Barry Underwood
Landside Operations Manager

Geraldton Depots/OBH
