

## Mid West Ports Authority (MWPA) – Asset Disposal

### 18.5m Barge

(All offers considered | Used condition)

The barge and equipment were purchased in 1987 and were used by the port to drive piles throughout the Fishing Boat Harbour (FBH) and as a floating jib crane for offshore construction works. In approximately 2010 it was placed in the ports storage yard at the FBH Reclaim where it is still stored today; the barge has been out of survey since going into storage.

This 18.5 metre long barge is made up of a series of tanks (6 tanks wide x 5 tanks long) with a central void for stability and scow end for towage. 6 spare tanks are also included; several of which were temporarily repurposed and have some minor additions.

Tank size is (approx.) 4.25m long x 1.8m wide x 1.8m high.

The barge includes 6 x air winches with 1 tonne capacity. One of the winches (pictured above) is relatively new and has undertaken very little work.

The Purchaser will be responsible for:

- The transport and any associated costs of removing the barge from the Port.
- Should the Purchaser wish to dismantle the barge, dismantling works are not to be undertaken on port land. However, the barge is stored in very close proximity to Geraldton Boat Lifters (GBL) yard and private arrangements may be made between the parties. GBL facility manager: Wayne Proudlove on 0427 373 205.

MWPA's safety and environmental policies and procedures apply to removing, lifting and transport whilst on Port land, or Port in waters.
