

WHAT IS THE PORT DOING?

1. Since the end of January we have had screening measures in place over and above Australian Border Force and Department of Health requirements;
2. Since the end of January our Coronavirus Response Team has been meeting each week day morning;
3. We recently undertook a desktop exercise with key local agencies (St John Ambulance, Department of Health and ABF) to formulate contingencies should a suspected case arise, either via cruise or cargo; and
4. Meetings weekly with the Operational Area Support Group to discuss the local situation and impacts.
